DETAILED ACTION

This Office action is in response to the applicant's amendment filed on 10/15/03.

Claim Rejections - 35 USC § 112

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claims 8-13 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

With regard to claims 8-13, these claims depend on the cancelled claim 1.

Correction is required.

Claim 8 recites the limitation "the container". There is insufficient antecedent basis for this limitation in the claim.

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 7-9, 10, and 13 are rejected under 35 U.S.C. 103(a) as being unpatentable over Close (US 4,265,953) in view of Chang (US 5,961,766).

With regard to claims 7, 10, Close teaches an elongated strip of flexible intumescent stressed skin composite material in fig. 5 comprising intumescent material 14, adhesive 12, 16 arranged on the intumescent material 14, a liner (not shown) was

cut and placed over the exposed adhesive layer to prevent bonding during storage and handling (col. 4, line 2-5). Close does not teach expressly a liner including a first portion covering the adhesive, a second portion arranged in at least partially overlapping relation with the liner first portion, and a tab portion arranged adjacent the liner second, whereby the tab can be pulled to release the liner first portion from the adhesive. Chang teaches an adhesive 202 covering by a liner 204. The liner 204 (see attached drawing fig. 4B) having a first portion A covering the adhesive 202, a second portion B arranged in at least partially overlapping relation with the liner first portion A, and a tab portion T arranged adjacent the liner second portion B, whereby the tab portion T can be pulled to release the liner first portion A from the adhesive 202. At the time of the invention, it would have been obvious to a person of ordinary skill in the art to combine Close with Chang for the liner arrangement including a first portion covering adhesive, a second portion partially overlapping the first portion, and the tab portion adjacent the second portion. The motivation for doing so would have been conveniently provide quick and easy pulling the liner or skin sheet.

With regard to claims 8-9, the "container" and its details are not positively claimed. And with regard to claim 13 is improper depend on the cancelled claim 1 (see above rejections, thus, a "container" should not be claimed.

Allowable Subject Matter

Claim 11 is objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims. The prior art fail to teach or render obvious the

claimed combination including the ends forming an annulus as specifically set forth in the claim.

Response to Arguments

Applicant's arguments with respect to claims 7-10, and 12-13 have been considered but are moot in view of the new ground(s) of rejection.

Conclusion

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Langer (US 4,048,363), Ten Eyck (US 4,999,168), Kelly (US 4,748,066) teach fire resistant device

Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.
